

Download contains 2 plugins, Monster Size Mod Plugin and Food Modifier Plugin (for N3DS only).

They can be used with Xelrix's Overlay Cheat Plugin, Setsu's Monster Info overlay plugin.

For N3DS/N3DSXL/N2DSXL:

- Extract archive and paste the plugin to SD:/plugin/0004000000197100/Monster_Hunter_XX_Double_Cross_NEET_EX.plg.
- For this method, you can have all those 4 plugins in the same folder.
- To run it, use BootNTR Selector (not the Luma plugin loader as this is not a CTRPF AR Plugin) then launch the game. If you got a green flash on screen, then it works.
- In case the game crashes just as the time you launch it, try deleting the config and mhxxcheat.cfg inside the title ID folder if it exists.

For O3DS/O3DSXL/O2DS:

- If you are using it with Nanquitas' CTRPF AR and Luma Plugin Loader, copy the 0004000000197100.txt (contains Gateshark codes) to SD:/cheats/<here>.
- Note that this method only allows you to use 1 plugin.
- If your O3DS/O3DSXL/O2DS gets an orange flash on screen, then your device can't handle it (3DS memory issue).

Note: Some of [++ymyn CHEATS++] won't work if you have Xelrix's Overlay Cheat Plugin.

User guide

Just remember to use the proper cheats to the appropriate weapon and do not multi-select the cheats
Press Y on a cheat to show notes.
